RelayCloud Sales and Billing Messages

Selected internal messages. All people and records are fictional. Snapshot: 2026-11-11T18:00:00-07:00

MSG-2026-104 | October 14, 2026 14:00 America/Denver | Morgan Lee, Sales Director -> Billing and Revenue Accounting | Signed amendments

The Cedar Harbor Labs allowance amendment and Meridian Process Systems platform upgrade are signed and effective October 16. Please use the executed documents for their terms and update the relevant systems.

MSG-2026-108 | October 28, 2026 11:00 America/Denver | Morgan Lee, Sales Director -> Priya Shah, Controller | Zephyr Grove request

Zephyr Grove requested a USD 100 concession for October workflow usage after a service interruption. The underlying contract pricing is unchanged.

MSG-2026-109 | October 29, 2026 15:00 America/Denver | Priya Shah, Controller -> Billing and Revenue Accounting | Approved Zephyr concession

Approved: reduce Zephyr Grove October usage consideration by USD 100. Issue a credit against its October-service usage invoice once finalized; ensure the October accrual is already net of this approved concession. Do not apply a second concession.

MSG-2026-116 | November 3, 2026 10:15 America/Denver | Alex Chen, Billing -> Priya Shah | Alder credit cancellation

The USD 50 Alder Fieldworks credit note cn_82a7ddd6e88e69 was created in error and voided before the NetSuite import. There is no other Alder credit note associated with this mistake. No credit or reversal has been posted to NetSuite; please use its void status when reviewing the current extract.

MSG-2026-119 | November 4, 2026 09:30 America/Denver | Priya Shah, Controller -> Revenue Accounting | October review

Sales has flagged an amendment that may not have reached billing. Review October service across the supplied customers, explain supported billing corrections and October accounting effects, and propose a repeatable review. Use later invoices as evidence; later-service issues are follow-ups rather than a required November reconciliation.

MSG-2026-125 | November 5, 2026 13:00 America/Denver | Alex Chen, Revenue Accountant -> Priya Shah | Extract status

The extract contains the usage accruals currently posted for October, base platform recognition, and routine contract-asset reclassification. The accrual work was prepared November 5. These are the existing records for your review; completeness and the application of contract terms have not yet been checked. October remains open for supported adjustments. September balances are finalized. Historical September journals are outside this extract, supported by opening balances and plan references.

MSG-2026-130 | September 15, 2026 16:00 America/Denver | Morgan Lee -> Priya Shah | Willow Passage onboarding

Willow Passage subscription service begins September 15. No metered production runs are expected during September onboarding. The platform subscription is chargeable during onboarding; there is no free subscription period.

MSG-2026-131 | November 6, 2026 10:00 America/Denver | Product Operations -> Revenue Accounting | Unverified workspace

Workspace pa_676b6b455e0887 has October metering but no verified billing owner. It could be an internal workspace or belong to an existing customer. Do not identify it by elimination from the customer list. Product Operations must verify ownership before Billing assigns usage. Account names and one-to-one assumptions are not evidence.

MSG-2026-132 | November 6, 2026 11:00 America/Denver | Morgan Lee -> Priya Shah | Willow Passage concession request

Willow Passage has requested USD 250 off October usage. This is a request only; I have no Controller approval and have not authorized Billing to issue a credit. The request does not establish ownership of any unverified workspace.

MSG-2026-133 | November 7, 2026 09:00 America/Denver | Priya Shah -> Revenue Accounting | Review authority

Recommend supported corrections for Controller approval. Billing documents proposed during this review use November issue dates, while supported October service adjustments retain the October posting period. Do not create live invoices or entries. Recommend updating an affected revenue plan; a future schedule or new system record is not required.
